## Nursing theories as nursing ontologies

Don Flaming<sup>1</sup>

Affiliations + expand

PMID: 15385032 DOI: 10.1111/j.1466-769X.2004.00191.x

### Abstract

By understanding the constructions of knowledge we currently label nursing theories as nursing ontologies, nurses can perceive these conceptualizations differently. Paul Ricoeur and Stephen White offer a conceptualization of ontology that differs from traditional, realist perspectives because they assume that a person's experience of a phenomenon (e.g., nursing) will change, but also maintain some stability. Discussing nursing ontologies, rather than nursing theories, might increase philosophy's status in nursing and may also more accurately reflect the experience of being a nurse.

## ABSTRACT

Clinical experience is essential to helping nursing students to achieve and practice professional knowledge and skills. Published reports indicate nursing students often experience incivility during clinical practice. The purpose of this study was to investigate nursing student incivility experience during their clinical rotations and the relationship of these experiences with their critical thinking dispositions. A cross-sectional descriptive correlational study design was utilized. Data were collected from junior (n = 195) and senior (n = 180) students in a

## Abstract

Man-made or natural disasters are occurring more frequently in the United States and around the world. It is important that all nurses in all specialties be prepared to care for people affected by disasters. This article reports a descriptive study that sought to explore nursing students' perceptions about disaster nursing and to use the findings to suggest recommendations for building the discipline of disaster nursing. Results of this study indicate that nursing students had the following gaps of knowledge regarding disaster nursing: (1) an incomplete definition of disaster nursing; (2) lack of recognition about the importance of knowing community resources, having mock disaster drills, and utilizing disaster planning models; and (3) lack of perception that all nurses could play a significant role in disaster situations. The authors recommend that disaster nursing be taught by nursing faculty as a specialty in nursing programs.

### Effect of coenzyme Q10 supplementation on fatigue: A systematic review of interventional studies.

1

Cite

Mehrabani S, Askari G, Miraghajani M, Tavakoly R, Arab A.

Share

Complement Ther Med. 2019 Apr;43:181-187. doi: 10.1016/j.ctim.2019.01.022. Epub 2019 Jan 23.

PMID: 30935528

Herein, we systematically reviewed available interventional studies to elucidate the overall effects of CoQ10 supplementation on fatigue among adolescent and **adult** population. METHODS: PubMed, Cochrane's library, Science direct, Scopus, Google scholar and ISI web of ...

### Concomitant upregulation of nucleostemin and downregulation of Sox2 and Klf4 in gastric adenocarcinoma.

2

Cite

Asadi MH, Derakhshani A, Mowla SJ.

Share

Tumour Biol. 2014 Jul;35(7):7177-85. doi: 10.1007/s13277-014-1966-1. Epub 2014 Apr 25.

PMID: 24763828

In addition to SCs, NS is also expressed in some highly proliferating cells including several **adult** stem cells and **cancer** cell lines. ...We have also examined a potential causative role of NS in gastric **tumorigenesis** by suppressing its expression in a gastric ...
